Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. According to a preliminary amendment filed on Sep. 26, 2006, the applicants have amended claims 4-7.
2. Claims 1-7 are now pending in the application.

Election/Restrictions

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) In part 1-7, drawn to Compounds of formula (1) represented by compounds where tricyclic ring structure is bonded to tricyclic ring structure represented by compounds disclosed on page 44 of specification and methods of using these compounds.

Group II, claim(s) In part 1-7, drawn to Compounds of formula (1) represented by compounds where tetracyclic ring structure is bonded to tetracyclic ring structure represented by compounds disclosed on page 46 of specification and methods of using these compounds.

Group III, claim(s) In part, drawn to Compounds of formula (1) represented by compounds where tricyclic ring structure is bonded to tetracyclic ring structure represented by compounds disclosed on page 48 of specification and methods of using these compounds.

Group IV, claim(s) In part 1-17, drawn to Compounds of formula (1) represented by compounds where tetracyclic ring structure is bonded to bicyclic ring structure represented by compound (29) disclosed on page 51 of specification and methods of using these compounds.

Group V, claim(s) In part 1-7, drawn to Compounds of formula (1) represented by compounds where tricyclic ring structure is bonded to bicyclic ring structure represented by compound (32) disclosed on page 51 of specification and methods of using these compounds.

Art Unit: 1625

Group VI, claim(s) In part 1-7, drawn to Compounds of formula (1) represented by compounds where tricyclic ring structure is bonded to tricyclic ring structure represented by compound (40) disclosed on page 53 of specification and methods of using these compounds.

Group VII, claim(s) In part 1-7, drawn to Compounds of formula (1) represented by compounds where tetracyclic ring structure is bonded to tricyclic ring structure represented by compound (41) disclosed on page 54 of specification and methods of using these compounds.

Group VIII, claim(s) In part 1-7, drawn to Compounds of formula (1) represented by compounds where tetracyclic ring structure is bonded to tricyclic ring structure represented by compound (45) disclosed on page 55 of specification and methods of using these compounds.

Group IX, claim(s) In part 1-7, drawn to Compounds of formula (1) represented by compounds where tetracyclic ring structure is bonded to tricyclic ring structure represented by compounds (47) or (48) disclosed on page 55 of specification and methods of using these compounds.

Group X, claim(s) In part 1-7, drawn to Compounds of formula (1) represented by compounds where pentacyclic ring structure is bonded to tricyclic ring structure or pentacyclic ring structure represented by compounds (53) or (54) disclosed on page 57 of specification and methods of using these compounds.

4. The inventions listed as Groups I through X do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

There is no common core which in the Markush Practice, is a significant structural element shared by all of the alternatives; see PCT Administrative Instructions Annex B Part I (f) (i) (B) (1).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charanjit S. Aulakh whose telephone number is (571)272-0678. The examiner can normally be reached on Monday through Friday, 8:30 A.M. to 5:00 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet Andres can be reached on (571)272-0867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
